Custom Driveway Gates...without the custom price! Our line of bolt-on artwork allows you to design your gate; from simple to extravagant. Easily add lighting to your gate with our Post Light Caps which accept any 3" collar post light.

These affordable gates are fabricated using hot-dipped galvanized steel and feature a durable black powder coat finish. The coordinating posts are fabricated using the same heavy-duty material and finish as our driveway gates and are constructed using 5/32" tubular steel. These 7' high posts also feature pre-drilled holes for hinge attachment and a conduit opening for easy wiring access. Our Adjustable Hinges have commercial grade sealed bearings which allow for minute adjustments and make installation a breeze!

Our Driveway Gates are easy to install with a few simple tools and require NO WELDING! Built to last a lifetime, our Driveway Gates provide security and add value to your property at a fraction of the cost of custom gates.
