EAGLE

EAGLE ACCESS CONTROL SYSTEMS

EAGLE CHROME
SERIES

RECEIVERS AND TRANSMITTERS

The CHROME series universal receivers and accompanying remotes utilize rolling code technology, providing optimum security and convenience for single-family homes, multi-unit communities and commercial buildings. This cutting edge technology comes with built-in, self-learning programming at the simple push of a button.

GENERAL INFORMATION

- For security, please read the instructions carefully before initial operation.
- Make sure power is off before connection.
- Do not attempt to learn a transmitter when your EAGLE operator is in use to avoid mis-operation.

Learning Button

TECHNICAL INFORMATION

- **Working voltage:** 12-24 VAC/DC
- **Temperature range**: -20 °C to 60 °C
- **Working frequency:** 433.92 MHz
- **Stored transmitters:** Rolling code 30-300 pieces
- **Relay contact load capacity:** 1A, 30V DC

TRANSMITTER PROGRAMMING

LEARNING A TRANSMITTER

1. Press the learn button on the receiver and wait for the LED light to turn red.

2. Press any one of the transmitter buttons twice.

3. The LED will flicker for several seconds before turning off which will indicate that the learning process is complete and successful.

DELETING A TRANSMITTER

1. Press and hold the learn button on the receiver for approximately 8 seconds after the red LED light turns on.

2. Once the red LED light is off, release the learn button.

3. The LED will turn red again for 2 seconds before turning off indicating that the deleting of the transmitter is complete.

SELF-LEARNING FUNCTION
ONLY AVAILABLE FOR 2 AND 4 BUTTON TRANSMITTERS

STEP 1
Press button 1 and 2 at the same time of your existing programmed transmitter.

STEP 2
Press button 2 of that same remote. This allows the receiver to enter the learning process.

STEP 3
On your new transmitter, press the same button you want to program TWICE. Now the learning process is complete and your new transmitter is ready for use.
