

Surface mounted electric gate lock with Fail Open functionality

LEKQ U4 (Patented)

High quality electrical lock with aluminium housing and stainless steel mechanism. The handles are blocked when the lock is powered. The 20 mm continuous adjustability of the bolts allows a perfect latching / locking of the mechanism. A solid stainless steel deadbolt with a 23 mm throw guarantees a secure locking. For a fast and highly precise installation, we recommend using the Drill-Fix drilling jig.

Lock box color options
